LAILA F1

An early sub-gynoecious hybrid, LAILA produces abundant yields of attractive bi-colour fruits. Fruits have glossy skint that provides good shelf life. Bitter less fruits have crispy and tasty flesh fetching high prices making LAILA the preferred choice of many farmers.

- Plant in well drained soils
- Performs well on mulch covered high beds with drip irrigation
- Adequate amount of organic matter in soil and basal fertilisers is important to support early and high bearing nature of the hybrid.
