

DONNA F1

- ❑ Early and vigorous hybrid
- ❑ Suitable for fresh green harvest
- ❑ High yield potential

DONNA F1

Early bearing DONNA has compact erect spreading plants with good vigor and canopy cover. With good branching and flowering, growers enjoy high yield potential of DONNA. This hybrid produces light green colored fruits that are 13 - 14 cms in length with high gloss. Long stalk and strong cap of fruits allow easy harvesting. Primarily used for fresh green purpose. Pungency is high.
